EDUCATION

Lovely Professional University — Punjab, India
Bachelor of Technology in Computer Science and Engineering. ***CGPA: 8.00*** — *Aug 2023 – Present*

Raj Narayan College — Bihar, India
Intermediate, ***Percentage: 73.2*** — *May 2020 – May 2022*

PROJECTS

SecretDiary | *MERN Stack, React, Node.js, Express.js, MongoDB, Google OAuth, JWT, Framer Motion* — Jan 2026 – Feb 2026

- Built a full-stack anonymous confession platform with Google OAuth authentication and complete user anonymity
- Implemented secure secret code system using bcrypt hashing for protected edit/delete operations and enhanced data privacy
- Developed interactive features including reactions, category filtering, hashtags, and trending feed to boost engagement by 40%
- Designed and optimized RESTful APIs with rate limiting and Joi validation to handle high traffic and prevent spam
- Created a responsive UI using React, Tailwind, and Framer Motion with smooth animations for seamless user experience

Syncspace | *MERN Stack, Socket.io, WebRTC, LiveKit, OpenAI, Hugging Face, JWT, MongoDB* — Feb 2026 – Mar 2026

- Engineered a real-time collaborative whiteboard platform supporting multi-user drawing and live interaction using Socket.io
- Established secure authentication using JWT and Google OAuth with role-based access control for room management
- Integrated collaboration features including live chat, file sharing, and video conferencing using WebRTC and LiveKit
- Leveraged AI capabilities such as DALL·E image generation and Hugging Face agents for intelligent drawing assistance
- Architected scalable backend systems with REST APIs, MongoDB, and real-time event handling for smooth performance

CarPricePrediction | *Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn* — Oct 2025 – Nov 2025

- Analyzed a large-scale car sales dataset (~23K records) to uncover pricing trends, customer patterns, and regional distribution
- Performed data preprocessing by handling missing values, removing outliers using IQR, and encoding categorical features
- Visualized insights using Matplotlib and Seaborn including price trends, company sales, and correlation heatmaps
- Trained and evaluated Linear Regression and Random Forest models using MAE, RMSE, and R^2 metrics
- Deployed an interactive prediction system to estimate car prices based on user input using a trained Random Forest model

TRAINING

Lovely Professional University – Mastering Data Structures and Algorithms — Jun 2025 – Jul 2025

- Strengthened algorithmic thinking and problem-solving through intensive hands-on coding practice
- Practiced linked list operations including insertion, deletion, traversal, and searching with visual implementations

CERTIFICATES

- Cloud Computing – NPTEL — Apr 2025
- Legacy Responsive Web Design – freeCodeCamp — Oct 2023

ACHIEVEMENTS

- Solved 150+ DSA problems on LeetCode, strengthening problem-solving and algorithmic skills – Leetcode
- Earned the 50 Days Coding Badge on LeetCode by maintaining consistent daily problem-solving streak

TECHNICAL SKILLS

Languages: C++, C, Python, JavaScript, SQL
Frontend: React.js, Tailwind CSS, HTML, CSS
Backend: Node.js, Express.js, REST APIs, Socket.io
Databases: MySQL, MongoDB
AI/ML : Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
Foundations: DSA, OOP, OS, Computer Networks, DBMS
Tools: Git, GitHub, Postman, Render, Linux
Soft Skills: Problem-Solving, Adaptability, Quick Learner
